iLink Professionals Since 1994

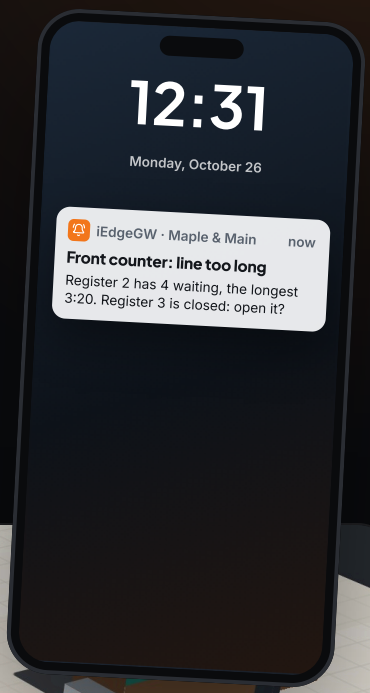

iEdgeGW LineSense
Front Counter & Checkout Lines

Live · AI in the store · Any counter

Every line. Every wait. Live.

Live wait times at every register, from the cameras you already have. The manager hears before customers walk out.

Shorter lines
See a line build at every register, and open the next one before it backs up.

The manager knows first
An alert by WhatsApp or e-mail, with the camera's picture and what to do.

Fewer walk-outs
Know who gave up waiting, at which register and at what time of day.

Uses your cameras
No sensors, no beams, no counters at the doors: the cameras you already have.

See it live at your own counter

iEdgeGW LineSense
Front Counter & Checkout Lines

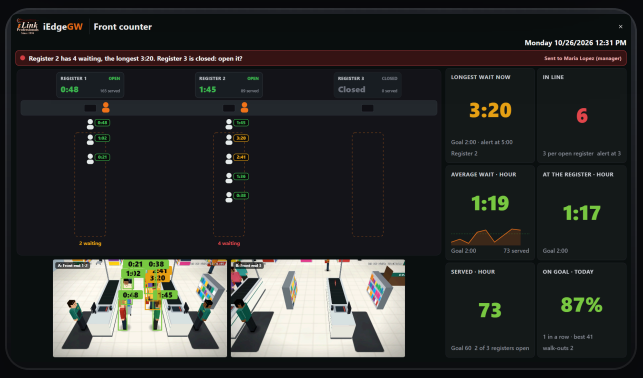

Everything your front counter needs to keep lines short

- Every customer timed live, from joining the line to the register
- Up to 8 registers a board, several lines per camera, up to 3 cameras
- Knows which registers are open: someone at the cashier's place
- Your goals on every wait: green, amber, red
- Alerts on a long line per open register, a long wait, a slow counter, walk-outs
- The alert names the problem and the fix: “Register 3 is closed: open it?”
- To the manager first, the supervisor if it lasts; it stops once back on goal
- By WhatsApp and e-mail; copies to FTP or Google Drive
- A live board for the front end, full screen on a TV with no PC
- Customers per hour, share on goal, time at the register, walk-outs
- Reports by register, day and hour, with the best and slowest hours
- PDF reports with charts: daily, weekly, monthly, by e-mail and WhatsApp

EACH PERSON, TIMED ON THE VIDEO

THE LIVE BOARD, ON ANY TV

Works wherever people line up

- **Grocery & supermarkets** — Checkout and express lanes
- **Department stores** — Cash wraps and returns
- **Restaurants & food courts** — Order, then pickup
- **Convenience & fuel** — Fast lines at the till
- **Pharmacies** — Pickup and drop-off
- **Home & electronics** — Front end and pro desk
- **Banks & service counters** — Tellers, post, parcels
- **Cafés & bakeries** — The counter at rush hour
- **Venues & hotels** — Box offices and front desks

Up and running in three steps

1. **Connect** — Your cameras and recorders connect to the iEdgeGW gateway in the store.
2. **Draw** — Mark each register's line and cashier's place on the picture.
3. **Serve faster** — Every wait timed live; the manager hears before walk-outs.

The AI runs in the store, on the iEdgeGW gateway: it counts and times people, it does not recognise them. No faces kept.
